STOCKS WERE FIRM

Discouraging Rumors Not Revived and Bears Ran to Cover.

Advances in the General List Ranged from 1-4 to 2 1-4 Per Cent.-Indianapolis Wheat Higher.

At New York, yesterday, money on call was easy at 1@14 per cent., the last loan being at 1, closing offered at 1 per cent. Prime mercantile paper, 31/2051/2 per cent.

Sterling exchange was steady, with actual business in bankers' bills at \$4.85%@ 6.85% for demand and at \$4.83@4.84 for sixty days: posted rates, \$4.841/2@4.87; commercial bills, \$4.82\\@4.82\%.

Silver certificates, 69%c bid. Bar silver closed at 67%c per ounce. Total sales of stocks amounted to 222,600 shares. At the opening of business at the Stock Exchange, yesterday, an attempt was made by the shorts to depress prices, which was partially successful in the early dealings. The bear campaign was not, however, of long duration, for the conditions did not seem to be entirely favorable, and many of the shorts turned tall and began to cover when they found that the market was strongly supported. Tuesday's disquieting rumors were not revived, and the air seemed to have cleared by the announcement that the Holland Trust Com-

pany, the financial institution which Tuesday's rumors referred to going into liquidation, had assets to meet all its obligations. The weakness of the London market for American securities was a factor in the early depression, and there were sales of St. Paul for the London account, which, however, caused a decline in these shares of only 1 per cent., which was soon recovered, and the final sale was 1/8 above Tuesday's close. Sugar was most actively traded in, and after an early advance of per cent, was attacked and forced down 1% per cent., but the stock was strongly supported from the inside, and quickly rallied on good buying, a great deal of which was to cover short contracts, the result being an advance of 314, of which only ¼ was lost at the close. Sugar pre-ferred rose 1¼ per cent. Western Union declined % in the opening trading and then took a sharp upward turn on heavy pur-chases, said to have been for the account of an inside pool. The advance from the low point of the morning was 2% per cent. Distilling fluctuated within a margin of % per cent., closing 1/8 below Tuesday. It was sold pretty freely during the earlier part of the day on the ways and means committee recommendation to tax spirits in bond, but on the general good feeling in the final dealings the shares recovered almost the

full loss. Atchison was strong on London buying which induced home purchase and scored a gain of % per cent. on the day. The general market was weak at the opening and reacted a fraction in the open trading, but quickly rallied and an advance of %@1% per cent. was recorded, the latter in Reading. Before II o'clock, a reaction of 1/8 to 1 per cent. had been effected, more than recovered within the following half hour. Then came a slight reactionary movement, but the market swung into the afternoon with a steady gait which gained in strength and with an occasional reaction brought prices up to the highest point of the day in the final dealings. The

to 24 compared with Tuesday's final sales. The bond market was heavy during the morning, but was strong in the afternoon, the feature being an advance of 41/2 per cent. in Louisville & New Albany general fives, to 67. Government bonds were steady. State bonds were inactive. The following table, prepared by James E. Berry, Room 16, Board of Trade, shows the range of quotations:

LOCAL GRAIN AND PRODUCE. Little More Life to Trade-Bottom Out

of Sugar, Eggs and Poultry. In some departments quite a trade was in progress yesterday. Dry goods men and greeers were doing considerable business, and on Commission row there was more snap. In sugars there was a considerable letting down. Eggs, butter and poultry are all weak at quotations, the mild weather increasing the receipts of butter and eggs largely. In other lines some weakness is shown. Oranges and apples are firm at the changes of Tuesday, while in vegetables an

easy tone to prices is noticeable.

There was more life to the local grain market yesterday. Wheat and several grades of corn advanced 1/2c. Track bids ruled as follows: Wheat-No. 2 red, 561/2c; No. 3 red, 54c; rejected, 40@45c; wagon, 56c. An Experiment in Feeding.

Philadelphia Record. A large number of Pennsylvania farmers feed steers in winter, procuring them in low condition from the stock yards, fattening them and marketing the lot as s on as they make sufficient gain in weight. It is not always done with a view of securing a profit from the steers, but to use the food so as to sell it in the shape of beef and to gain the manure. Straw and corn fodder are too bulky to be profitably shipped, and by the use of steers there is a saving in that respect. Experiments were made at the Maryland agricultural experiment station (the details of which are too lengthy to be given), in order to test the advantage of feeding steers on a full ration, balanced as nearly as could be done, and feeding another lot on a ration

less costly. In addition to the use of foods produced on the farm, cotton-seed meal and bran were purchased, while fine crushed corn and cob meal, turnips and cut corn fodder were also allowed. With both lots the cut fodder was moistened, and the grain mixed with it one feed ahead, the turnips being chopped and added just before feeding, and a sprinkling of salt given. The ration of lot No. 1 (the well-fed steers) consisted of corn and cob meal, cotton-seed meal and bran, in proportions of four parts cotton-seed meal, fifteen parts corn and cob meal and two parts bran, with five pounds of cut turnips and a half pint of molasses as a condiment. Lot No. 2 received simply the corn and cob meal, turnips and mo-lasses, but soon grew tired of the latter, which was discontinued. Lot No. 1 received four pounds of the cut fodder to six of grain, in mixed feed, and lot No. 2 received four pounds of the cut fodder to five of grain. No record was kept of the amount of food consumed by individual steers, they being fed according to the demands of appetite. Lot No. 1 consumed nearly 800 pounds more grain and 246 pounds more fodder than lot No. 2, or an average of 8.8 pounds of grain and 2.7 pounds of fodder. Lot No. 1 made a daily gain, in the second period of feeding of 4.72 pounds and lot No. 2 gained 2.81

pounds daily. It was demonstrated that for fattening steers a well-balanced ration is very much more profitable than a poorly balanced onc, and that for the whole period of feeding the well-fed steers gained 2.78 pounds daily and the others 1.70 pounds, or more than double the gain for the well-fed lot. The increased profits from this test showed a difference of \$7.06 per steer in favor of the well-balanced ration. That is, the farmer can buy bran and cottonseed meal, and clear a profit by so doing. It is believed that with a well-balanced ration as good daily gains can be made with cut corn fodder as with hay. This is an important point in favor of the farmer. Ninety days is sufficient to feed a steer for market. The use of cut corn fodder in feeding cattle may make the difference of a profit instead of a loss. What is one of the most important results, in addition to the clear gain of \$7.06 in favor of the well-balanced ration, is the fact that 50 per cent. more manure was made from the steers receiving it than from the second lot, and the manure was much

richer in plant food. A Mother's Duty.

The woman was up before the court for whipping her husband, and as it was to be severe. "Prisoner," he said sternly, "you have been here before on the same charge, but knowing the kind of a man your husband i is I have been lenient. Now what have you to say? Why do you persist in your conduct?" "Well, your Honor," she said, decisively, "I've got it to do. I have four girls grow-

in' up, and like as not they'll marry good

fer nothin' husbands like I did, and, your

Honor, I'm settin' them a good example,

that's all," and the judge let the case go

REACTION IN WHEAT

Liberal Exports and Light Receipts Caused a 1-2c Advance.

Strength in the Leading Cereal Helped Both Corn and Oats, but Provisions Declined Materially.

CHICAGO, Jan. 3.-After a weak opening, caused by heavy foreign cables, wheat advanced to-day on liberal export clearances, light receipts and light foreign shipments, and closed 1/2c higher than yesterday. May corn gained 4c, May oats 4c, but provisions suffered heavily from the increased movement of hogs.

Wheat started at a decline, May opening %c lower at 64%c. The cause of the early the foreign markets and the subsequent liberal offerings. The export clearances put an end to the decline and started an enerdepression was the discouraging aspect of getic advance. Clearances from the seaboard included 453,000 bushels of wheat and 56,000 barrels of flour, equal to 700,000 bushels of wheat. The offerings, which had gone begging at the opening, immediately found takers, and May soon scored an advance of %c. Receipts were moderate. Chicago got 196 cars, compared with 718 cars a year ago, and Minneapolis and Duluth reported 351 cars, as against 359 on the corresponding day last year. Smaller Eastern, European, South American and Australian shipments caused further firmness, which continued until Bradstreet's visible supply was received. It showed an increase of 187,000 bushels east of the Rockies, a decrease of 283,000 bushels west, an increase in the stocks affoat for and in Europe of 352,000 bushels, and an increase of 256,000 bushels in the entire visible supply of wheat, exclusive of Australia. On this showing prices declined for a time, but at the close a slight rise in the price of wheat and flour was reported from Paris, and reports were circulated of heavy shipments from St. Louis of wheat for export. This resulted in a rally, which landed May at the end of the session but 1/sc below the top figure of the day. May opened at 64%c, advanced 16c, lost 16c, advanced 16c, lost %c, advanced %c, and reacted %c to close at 65%c.

Corn was helped by the strength in wheat. Depressed by heavy receipts. May opened 1/3c lower at 381/3c, but with the bulge in wheat advanced 1/2c to 385/8c. Bradstreet's increase in the visible supply of corn caused a reaction of 1/4c, but with the closing strength in wheat, May advanced 1/8c and closed at 38%c, or %c below the top figures of the day. Oats were quiet but firm, influenced by the strength in wheat and corn, by Bradstreet's small increase in the visible supply

and by a decrease in the stocks of contract oats in store. May opened 1/3c lower at 301/3c, declined 1/3c, advanced 1/3c and reacted 1/3c, to close at 301/3c, or 1/3c from the top figures of the day. Liberal hog receipts started the provision market at a decline, and liberal offerings caused a further decline. Little buying brought about a temporary reaction, but

free selling started prices down again, and a loss all around was scored at the close. Compared with last night, May pork is 221/2c lower, May lard .123/2c lower and May ribs .15c lower. Estimated receipts for to-morrow are: Wheat, 91 cars; corn, 420 cars; oats, 120 cars; hogs, 32,000 head. Leading futures ranged as follows:

Dry Goods.

NEW YORK, Jan. 3.-The changes in the dry-goods market, though slight, have been generally favorable. The talk is generally more cheerful, but as yet the greater confidence has not been expressed to any considerable extent in the actual takings of buyers. The more bullish talk as to the cotton market, based on the falling off in the receipts is reflected in a rather firmer market for cotton staples without resulting in quotation changes in price. The difference seems to be based on the hope of a general revival of business interests. Print cloths hold about steady, at full prices, but are quiet, with the demand restricted almost altogether to spring styles. The market for ginghams and woven fabrics and dress goods generally is steady and moderately active. The jobbing trade opens up in pretty good form with a good attendance of buyers and some larger confidence shown in providing for future wants.
